

How accurate is your coding? Auditing

Do you know the accuracy of your coded data and the impact this has on your business? Resolutions' experienced auditors perform coding, documentation, revenue optimisation and system audits to ensure that your facility is providing quality coded data and meeting all funding and statutory compliance requirements. We will identify the root cause for any coding variances so that these can be rectified to provide value data and appropriate DRG assignment and reimbursement.

Coding audits to optimise revenue

We guarantee that our auditors will find missed revenue. In our 25 years in the industry, we have found revenue in every audit we have conducted. The superior knowledge and experience of our auditors ensures they will identify coding discrepancies, under or over-coding and commonly missed conditions that impact on DRG assignment, including identification of HAC opportunities.

Coding audits for quality reviews

Our auditors will review all stages of the coding process, checking that your coding staff are correctly abstracting information from the medical records, documentation is sufficient, and coding standards are being correctly interpreted and applied. We will identify the root cause and reason for coding discrepancies, providing an opportunity to improve coding quality through appropriate feedback and education.

Documentation audits to ensure compliance

Resolutions will ensure you are meeting all legislative and statutory requirements with regards to documentation, to meet your healthcare accreditation requirements. We ensure your documentation adheres to National Safety and Quality Health Service (NSQHS) standards and meets industry best practice.

Confidence in data integrity

Do you really know how accurate your clinical coding is and the impact this has on your revenue and quality? A coding audit by Resolutions will assess your current coding accuracy and data integrity. This will give you confidence in your data quality and assurance that your revenue opportunities are maximised.

Experienced auditors you can rely on

Resolutions has a proven track record of delivering auditing services to the health industry for 25 years. Our network of auditors all have a minimum of 10 years' experience auditing all specialities across all hospital types, from day hospitals to tertiary facilities. Our auditors are leaders in the industry and have been involved in large scale state-wide and international audits, as well as contributing to the development of the classification and coding standards. Our team have a superior knowledge of the interpretation and application of ICD-10-AM classification and coding standards.
